Outcomes

- Cloud adoption plan
- Reference architecture
- TCO analysis

Across industries, cloud computing is changing the way organizations run their businesses. They're seeking ways to become more agile, flexible, and better able to drive continuous innovation. They need simple, elastic, and on-demand IT environments. While many are finding solutions to problems through growing use of cloud, others continue to find a need for on-premises private cloud. Pure Storage® is in a unique position to combine the two paths into one, providing a reliable, secure, and seamless multi-cloud solution.

When your business is ready, extend your on-premises cloud to public cloud, leveraging Pure Storage cloud data services. Deliver bi-directional application and data mobility across your hybrid infrastructure with seamless management and orchestration. Build your applications once, run them anywhere.

The Customer Experience

Pure Storage Professional Services exists to enable you to realize the value of your IT investments. As an integral part of the Pure Customer Experience (CX) team, we engage with organizations to evaluate, activate, and innovate their IT solutions.

Through the phases of a customer engagement, we provide services and solutions to enable you to achieve your business outcomes. The Multi-cloud Strategy Workshop is a consulting service for organizations looking to solve cloud-adoption challenges and protect data across both public- and private-cloud infrastructures using Pure Storage cloud data services.

DATA SHEET

During the service engagement, Pure Professional Services team will focus on driving efficiency, performance, resilience, and stability. Pure deliver true hybrid operations with consistent data services, resiliency, and APIs, plus bi-directional mobility, seamless management, and simple orchestration.

No matter where you are on your cloud journey, Pure Professional Services can help by conducting an initial workshop to understand your strategic goals and specific pain points. From there, we provide a reference architecture and design services, analyze return on investment using Pure1® tools to assess cost savings when migrating to public cloud, and create a cloud adoption plan to provide a streamlined migration across a Multi-Cloud Solution Architecture.
